## 200 FLEXIBLE GRAVITY CONVEYOR

### DETAILS

#### **FLEXIBILITY**

Able to bend and twist as needed to go around obstacles. Conveyors can curve up to 180°.

#### **SELF TRACKING**

Cartons will follow the twists and turns of the conveyor path without using engineered curves.

#### **EXPANDABILITY**

Designed to expand and contract as needed to help with the loading and unloading process and minimize storage footprint.

#### **ROLLERS**

Zinc plated 1.375" steel rollers provide maximum durability.

Designed to expand, contract and move easily, the NESTAFLEX 200 is a self tracking, gravity roller conveyor that has a per linear foot capacity of 200 pounds. The all steel construction provides unmatched structural integrity, whether the conveyor is extended, contracted or configured in simple or compound curves.

This unit is engineered to handle odd shaped cartons, drums, and pails in low to medium volume applications. It is the best choice for moving items without a flat, solid surface.
