

TIRELESS LIKE A KANGAROO

When sorting and loading flight baggage, the highest level of reliability and dependability is required. The m06 carousel »FSC« was developed specifically for use in airports and is a real specialist. During development, one of the main focuses of attention was on the modular concept with convex and concave curves in order to effectively use the available space. With a noise level of approx. 60 dBA, the carousel is one of the quietest of its class.

PRODUCT FEATURES

- Ultra-simple adjustment to required installation conditions
- Horizontal or sloping design
- Casing can be steel-coated or stainless steel
- Low-maintenance friction drive
- »EIS system«: rapid assembly due to simple modular system, perfectly optimised for transportation
- Energy-efficient and economic design

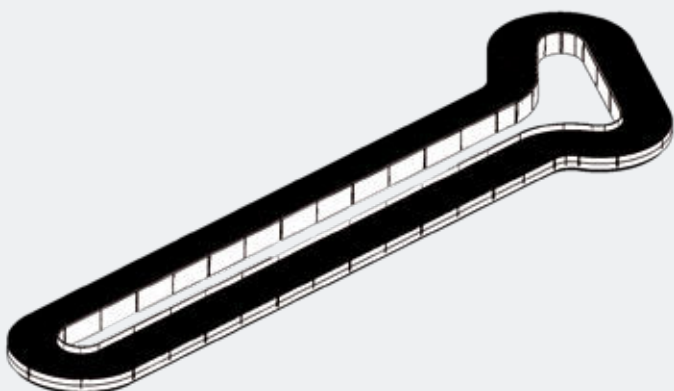

FIELDS OF USE

Airport Solutions:

- Carousel for baggage reclaim
- Carousel for baggage sorting

Intralogistic Solutions:

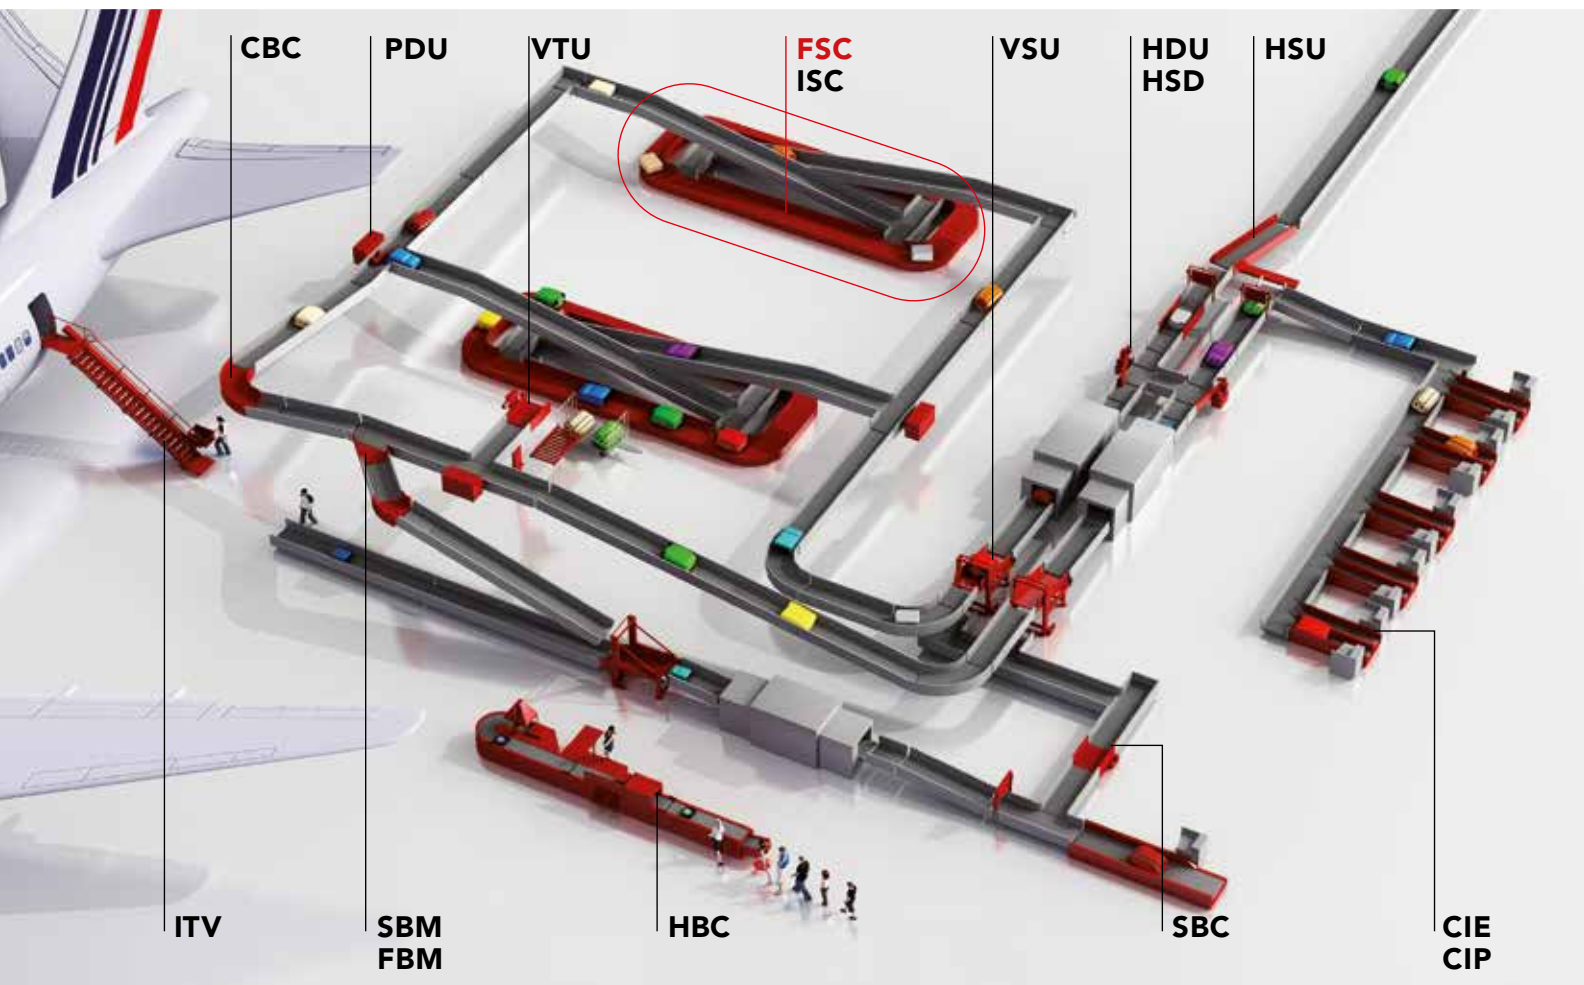

- Sorting systems in the post and parcel sector

TECHNICAL DATA

Conveyor speed	up to 0.5 m/s
Conveyor length	up to 100 m per drive
Loading height	400 mm
Operating width	1,000 mm
Baggage weight	up to 50 kg

USED WORLDWIDE

FULL SERVICE BY MOTION06

motion06 develops, builds and installs the most intelligent conveyor systems for airports, intralogistics and industry. The foundations of our company are the highest quality standards, individual concepts and complete solutions, together with continual further development. Every one of our products stands for well thought-out, sophisticated technology, precision and intelligent simplicity. We consider project safety and speed in the implementation to be par for the course. Worldwide.
